- Skiing

6 Courses

Crash Course on Python

Using Python to Interact with the Operating System

Introduction to Git and GitHub

Troubleshooting and Debugging Techniques

Configuration Management and the Cloud

Automating Real-World Tasks with Python

Feb 5, 2023

THOMAS SCHEIBER

has successfully completed the online, non-credit Professional Certificate

Google IT Automation with Python

This six-course certificate, developed by Google, is designed to provide IT professionals with in-demand skills -- including Python, Git, and IT automation -- that can help them advance their careers. The hands-on curriculum is designed to teach learners how to write code in Python, with a special focus on how this applies to automating tasks in the world of IT support and systems administration. Those who received this certificate passed all graded assessments with a score of 80% of above. They should have a strong foundation in how to use Git and GitHub, troubleshoot and debug complex problems, and apply automation at scale by using configuration management and the Cloud in order to prepare them for more advanced IT Support Specialist or Junior Systems Administrator positions.

5 Courses

Technical Support
Fundamentals

The Bits and Bytes of
Computer Networking

Operating Systems and You:
Becoming a Power User

System Administration and
IT Infrastructure Services

IT Security: Defense against
the digital dark arts

28.01.2022

THOMAS SCHEIBER

has successfully completed the online, non-credit Professional
Certificate

Google IT Support

Those who earn the Google IT Support Professional Certificate have
completed five-courses, developed by Google, that include hands-on,
practice-based assessments and are designed to prepare them for
entry-level roles in IT support. They are competent in foundational
skills, including troubleshooting and customer service, networking,
operating systems, system administration, and security.
