Thomas **Scheiber**

Software Development & Automation

Vienna, Austria | mail@thomasscheiber.com
thomasscheiber.com | github.com/t-scheiber
linkedin.com/in/thomas-scheiber

Professional Summary

I build internal web applications and automate IT workflows with TypeScript, Next.js, Python and PowerShell. At Refurbed, my work included employee equipment workflows, identity integrations and application deployment through GitLab CI/CD to Google Cloud Run. I also develop client websites and applications.

Skills

Frontend Development: TypeScript · Next.js · React · Tailwind CSS · Responsive Design · SEO
Backend & APIs: Python · Node.js · REST APIs · SQL · PostgreSQL · SQLite · OpenAI API · Claude API · .NET
Automation & Cloud: PowerShell · Git · GitLab CI/CD · Docker · Google Cloud Run · Cloud SQL
Identity & IT: Microsoft Graph · Entra ID · Microsoft 365 · Intune · Windows Server · Linux · Active Directory

Professional Experience

IT Administrator
Refurbed Marketplace GmbH | Vienna, Austria | Jul 2024 – Dec 2026, agreed end

- Developed and deployed internal applications with GitLab CI/CD and Google Cloud Run, including Entra ID sign-in, Microsoft Graph integrations and Cloud SQL databases.
- Deployed a Forgejo and Coolify pilot on existing company hardware for colleagues to host and deploy applications, with access controls, AI review and recovery documentation.
- Replaced USB-drive imaging with Microsoft Intune and Autopilot Device Preparation v2, adding PowerShell setup automation and PXE boot.
- Managed endpoints, networking and user support in a two-person IT team.

Freelance Web Developer
Self-employed | Vienna, Austria | Jan 2023 – Present

- Built Next.js, React and TypeScript websites for Mayr Dach and EuropeTalks, and a guest document-upload application for Villa Claudia.
- Maintain production deployments on Vercel and Coolify and work on SEO and Core Web Vitals. Built five WordPress websites.

Associate IAM Consultant
iC Consult GmbH | Vienna, Austria | Apr 2023 – Dec 2023

- Developed identity and access management solutions for UNIQA and AVL using One Identity Manager, PowerShell, Visual Basic and .NET.
- Implemented PowerShell connectors for UNIQA as part of a Scrum team of employees and external consultants.

IT Consultant
Mazars IT Services GmbH | Vienna, Austria | Mar 2022 – Mar 2023

- Led Microsoft Intune and Autopilot deployment for the company’s devices and deployed Jamf Pro to manage every company iPhone for ISO certification.
- Managed firewalls and network infrastructure, provided first- and second-level support, and documented solutions.

Selected Projects & Initiatives

AI Pull-Request Reviewer

Python · OpenAI Responses API · SQLite · Forgejo
Refurbed | Internal pilot | Updated Sep 2026 | thomasscheiber.com/workprojects#platform

- Built an advisory pull-request reviewer that checks structured findings against the reviewed diff. SQLite jobs preserve work across restarts and prevent duplicate comments.
- Tested broken and corrected code, cross-file defects and embedded prompt injection; checked restart recovery and replay behaviour.

Employee Equipment Automation

Next.js · TypeScript · PostgreSQL · REST APIs · Notion
Refurbed | Internal application | Updated Sep 2026 | thomasscheiber.com/workprojects#equipment

- Built onboarding and return workflows with device selection, shipping, tracking and Notion records. Persistent claims prevent retries from repeating completed external actions.
- Moved address checks into the employee form and rechecked them on the server. Uncertain carrier responses require reconciliation before another label purchase.

EuropeTalks Membership Platform

Next.js · TypeScript · Clerk · Nextcloud SSO
Freelance | Public website and member services | europetalks.eu

- Built the website and connected Nextcloud to the same Clerk login, with admin, member and guest roles across both.
- Built an editor for members to review and correct machine translations; added Google OAuth and passwordless email sign-in.

AI Image Classification Web App

Bachelor's project · TensorFlow.js · React
FH Technikum Wien | Bachelor's project

- Built an image-classification model and data pipeline, with browser inference in TensorFlow.js and a React interface.

Education

TU Wien. Master's in Software Engineering. Ongoing

University of Applied Sciences Technikum Wien. B.Sc. in Engineering, Smart Homes & Assistive Technologies, passed with merit. Sep 2019 – Mar 2022

Languages

German: Native speaker | English: Fluent C1 | Italian: Intermediate B1

Hobbies

Photography · Mountain Biking · Ski Touring · Smart Home Automation
